Have you ever imagined a time when voting to protect our environment would become a natural part of politics? For over 25 years, CLCV has been nonpartisan because we believe that concern for the environment should transcend party lines. Indeed, according to our polling, Californians everywhere want cleaner air and water, and stricter enforcement of our environmental laws.

How have elected officials responded? Inside the **1999 California Environmental Scorecard** you will see that CLCV's '98 election efforts—our campaigns and your votes cast on election day—had a great effect. For the first time in over 16 years, the legislative year resulted in a record number of pro-environmental bills that passed the legislature and received the Governor's signature. Again in 1999 there was an increase in the number of Republicans voting for the environment.

So let me thank you. Whether you've been a member for two decades or are opening the pages of our Scorecard for the first time, we appreciate that you want to know how your legislators have responded to your environmental concerns.

But let me also urge you to imagine where we need to go. California will continue to grow and change in this new century. Now, more than ever, we have a responsibility to ourselves, and to future generations, to continue to push for a healthy environment. In the meantime, we must repair the damage that has been done from years of environmental neglect and advocate for re-investing in California's environmental future.

Behind each of our legislative victories in 1999 was a hard-won campaign against polluters and big business. Now is no time to breathe a sigh of relief.

Now is the time to roll up your sleeves and plunge your hands into the future by choosing the leaders to take us there. Use this Scorecard to determine whom we should return to office. Clip out CLCV's voting recommendations (on the back page) to take with you to the polls on March 7. Send your friends, family and co-workers to Ecovote Online at www.ecovote.org, and consider giving a gift membership (p.3) to someone who cares about the environment.

Jon Rainwater
Executive Director

P.S. Keep up with environmental politics at Ecovote Online, www.ecovote.org. There you will find our Scorecard, endorsements, and information about how to help on current environmental campaigns; follow links to your representatives; register to vote; research who and what is polluting your own neighborhood.

CLCV: POLITICAL ACTION FOR ENVIRONMENTAL PROTECTION

The California League of Conservation Voters is the non-partisan political action arm of California's environmental movement. For over 25 years, CLCV's mission has been to protect the environmental quality of the state by working to elect environmentally responsible candidates to state and federal office, then holding them accountable to the environmental agenda.

CLCV conducts rigorous research on candidates and concentrates on the races where our resources can make a difference. We back our endorsements with expertise, assisting candidates with the media, fundraising and grassroots organizing strategies they need to win. We work to educate voters, then help get out the vote on election day.

CLCV is also a legislative watchdog. Each year, we track scores of environmental bills and votes in Sacramento and work to make sure legislators hear from environmental voters. At session's end we publish the California Environmental Scorecard to help voters distinguish between the rhetoric and the reality of a lawmakers record.

The Scorecard records the most important environmental votes of each legislative year. Now in its 26th year, the Scorecard—distributed to 25,000 CLCV members, other environmental organizations and the news media—is the authoritative source on the state's environmental politics.

ACKNOWLEDGEMENTS

CLCV thanks the following organizations and individuals for their contributions to the 1999 Scorecard: Audubon Society, Californians Against Waste, California Public Interest Research Group, Clean Water Action, Mark Deitch and Associates, Inc., Environmental Defense Fund, Environmental Working Group, Mountain Lion Foundation, Natural Resources Defense Council, Planning and Conservation League, Price Consulting, Sierra Club California and V. John White Associates.

NOTES ON THE SCORECARD

This edition of the California Environmental Scorecard evaluates floor votes by the 1999 session of the Legislature on 16 key environmental bills.

Bills listed are not all the environmental bills of the session, but those judged most important by a consensus of the environmental community. (See p. 2 for a list of participating organizations.) Votes counted for scoring may not be the final roll call: the Scorecard panel decided which votes were most indicative for each bill.

Pro-environment votes are designated by ✓; anti-environmental votes by ✗. Members who did not vote are marked NV, and those not eligible for a vote as NE. Final scores are the percentage of pro-environment votes cast, not counting absences.

CLCV BOARD OF DIRECTORS

Executive Committee

Ruth Hunter, President

1999: A HIGHER EXPECTATION APPROACH TO THE ENVIRONMENT

Environmentalists have much to be happy about in 1999. The year brought a pro-environment legislative agenda, reflecting a growing majority in the legislature and a breath of fresh air in the Governor's office. A number of priority bills giving Californians cleaner air and drinking water, and protecting and restoring our natural environment, passed the legislature and were signed by **Governor Davis**.

While we have a pro-environmental majority in the Capitol, and strong environmental champions, they are hampered by anti-environmental forces. In addition, we are feeling the full impact of a term-limited legislature.

Each election cycle sweeps in a new batch of freshmen legislators, who often face a steep learning curve, while "old" environmental champions are swept out. Often there is not enough experience or institutional memory to move strong bills to the Governor's desk. The result is the continuation of a disturbing trend: good environmental bills are killed in committee and others are significantly weakened by the time they get to the floor.

The freshman class brought us emerging legislative leaders, such as Senator **Wes Chesbro**, whose bill to increase plastics recycling stalled because of industry attack. The bill, **SB 1110**, returns in 2000. Assembly Toxics Committee Chair **Hannah Beth Jackson** refused to cave in to the oil industry's pressure to weaken her offshore oil pipeline bill, **AB 1280**, but saw it fail, largely due to a group of colleagues who failed to cast a vote. **AB 641 (Lempert)**, a bill to clean up bay pollution that was vetoed twice by **Governor Wilson**, suffered the same fate. For this reason, the votes of Assemblymembers recorded as present but not voting on **AB 1280** and **AB 641** are scored as anti-environmental in this Scorecard.

Among this year's legislative successes were the *Clean Water and Enforcement Act*, **AB 1104** and **SB 709 (Migden)**, a bill with teeth. It directs the lagging State

Water Board to crack down on some of the most notorious repeat water polluters, and ensures that punishments for violators offset the economic benefits of continued pollution. **SB 496 (Sher)** capped a ten-year campaign to designate 39 miles of the South Fork Yuba River as wild and scenic, protecting it from the threat of dams. The legislature also tackled two issues left dangling from 1998, re-authorization of Superfund and the long sought expansion of the successful Bottle Bill program to include additional containers.

If percentages were everything, the Governor's 77% would give him a "C+." However, Davis deserves extra credit for good environmental appointments and his leadership on a number of key issues that were left on the cutting room floor of the Wilson era. These include signing the *Children's Environmental Health Protection Act*, **SB 50 (Escutia)**, and a green budget that environmentalists hope signals a commitment to re-invest in California's environmental future and repair the damage done during prior administrations. The Governor also earns high marks for his leadership in helping to pass both a badly needed parks bond, and a water bond that eases the pressure for new dams by funding flood control projects and other programs.

The Governor's few vetoes included a priority bill to address the use of dangerous pesticides on school grounds, **AB 1207**, the *Healthy Schools Act (Shelley)*. Pesticide industry pressure pared the measure to a simple, but key first step requiring warnings, and the veto was a significant disappointment.

Environmentalists have a higher expectation approach for the legislature and this Governor: balance. Not a balance that started on January 1, 1999, but a balance that corrects the previous 16 years of environmental neglect. The Golden State is enjoying an era of prosperity. Now is the time to invest in a sure thing: repairing and protecting California's environmental health and resources for our future.

BEST & worst

New Kids on the Block:

Freshmen legislators scoring 100% are Assems. Hannah Beth Jackson, Audie Bock, Ellen Corbett, John Longville, Gloria Romero, Darryl Steinberg, Pat Wiggins, and Sen. Wes Chesbro. Chesbro and Jackson also carried significant environmental legislation.

Heavy Lifter:

Assem. Ted Lempert gets extra credit for carrying a heavy load of pro-environmental legislation. His efforts included an attempt to re-authorize the state's "toxic hot spots" program, upping the penalties for oil spills, and tightening standards for wetlands restoration programs. He also worked to create the nation's first mandatory program to keep freighters and other big ships from emptying exotic organisms along with their ballast water into our fragile bay ecosystems.

Green Badge of Courage:

Move over Margaret Thatcher. What the "Iron Chancellor" was to British conservatives, Assem. Carole Migden is to enviros. She took a hard line with polluters on her Clean Water Enforcement Act, establishing clear bottom lines and not budging to pressure. Her resolve and leadership resulted in one of the year's best bills.

Best Bill That Didn't Go Anywhere:

Assem. Lempert's AB 641, which would have continued and strengthened the state's "toxic hot spots" program, now three years overdue for renewal. Funded by polluters, the program determines who's responsible for pollution in our bays and estuaries.

MIA:

The San Joaquin Valley is plagued with some of the worst environmental problems in the state, from pesticide drift and air and water pollution to urban sprawl and disappearing farmland. As CLCV's latest statewide poll shows, concern for the environment is strong in the Central Valley, yet many of its representatives haven't gotten the message. With the exception of Sen. Pat Johnston and Assem. Mike Machado, no San Joaquin Valley legislator scored above 70%, and four scored a dismal 7% or less.

Budget Heroes:

The 1999 budget was the greenest in years, and a major first step in re-investing in California's environment. Hats off to Governor Davis, Sen. John Burton and Assem. Antonio Villaraigosa for exemplary

leadership. Special credit goes to the legislative insiders: committee and subcommittee chairs Denise Ducheny, Byron Sher, Steve Peace, Virginia Strom-Martin. These leaders secured over \$150 million for land conservation and the largest enforcement funding in years.

From Out of Right Field:

Though she struck out in her Scorecard votes, Sen Cathie Wright hit a home run in the Senate Budget Subcommittee on Resources by casting the critical vote to secure full funding for the Marine Life Management Act, the landmark 1998 bill to protect marine fisheries and habitat. Without Wright's support, the funding request would have died.

A Special Salute ...

goes to outgoing Assembly Speaker Antonio Villaraigosa, who has earned high respect for his leadership and his accessibility. He leaves a noteworthy environmental legacy that includes legislation to curb diesel fuel emissions, and helped pull together the most diverse coalition ever to pass a landmark parks bond that includes funding for urban open space and state parks.

THE GOVERNOR

Score in 1999: 77

MOST IMPROVED¹

Bruce McPherson (+19),
Mike Machado (+12), Steve Peace (+12)

WORST DECLINES

Dennis Cardoza (-22), Dick Floyd (-20),
Lou Papan (-15), Tony Cardenas (-14),
Martin Gallegos (-14), Sally Havice (-13)

¹ - To be eligible for the Most Improved list, legislators must achieve a minimum score of 40.

FIVE-YEAR AVERAGES

ASSEMBLY

SENATE

THE AGENDA: BILLS THAT MAKE UP THE SCORES

- ✓ PRO-ENVIRONMENTAL BILL
- ✗ ANTI-ENVIRONMENTAL BILL
- ▲ PRO-ENVIRONMENTAL ACTION BY GOVERNOR DAVIS
- ▼ ANTI-ENVIRONMENTAL ACTION BY GOVERNOR DAVIS

AIR QUALITY

1. CHILDREN'S ENVIRONMENTAL HEALTH ✓

Many of the standards set by state air pollution officials for acceptable levels of smog and toxic pollution rely on health studies of an average adult male. **SB 25 (Escutia)** requires the state to review public health standards for air pollutants to ensure they are set at science-based levels that protect children. It also increases air pollution monitoring around schools and daycare centers. A top environmental priority, it was vetoed last year by outgoing Governor Wilson. This year Governor Davis fulfilled his campaign promise to sign the bill.

▲ Signed into law

CALIFORNIA ENVIRONMENTAL QUALITY ACT

2. CEQA ✓

SB 755 (Hayden) strengthens California's bedrock environmental law by updating it to include several court rulings and by closing loopholes that have diminished the law's effectiveness in controlling impacts that new projects have on the environment.

Held in Committee. Two year bill.

COASTAL PROTECTION

3. BAY CONSERVATION ✓

The Bay Conservation and Development Commission (BCDC) has jurisdiction over land use planning along the rim of the San Francisco Bay. BCDC's stewardship of this resource is hampered because it is not allowed to consider the impacts a development will have on wildlife and it does not have the resources to enforce its permits. **AB 647 (Aroner)** would have required the BCDC to address wildlife impacts in its permits and would have allowed citizens to sue to enforce BCDC permits. Citizen suits are an important part of the enforcement of the federal clean air and clean water programs as well as California's Prop 65, which prevents exposure to toxic chemicals.

Held in Committee. Two-year bill.

4. SEA LIFE RESERVES ✓

California has 104 marine reserves that were established at different times to protect parts of the ocean environment that were threatened. **AB 993 (Shelley)** sets up a process for the state to establish a more effective network of reserves to ensure maximum environmental benefit, and sets statewide scientific guidelines for reserves.

▲ Signed into law

5. OFFSHORE OIL DRILLING ✓

Experts agree that the safest way to transport oil from offshore platforms is by pipeline. Although most operations in California now use pipelines, they are not required to by law. **AB 1280 (Jackson)** would have required that any new pumping operation off the California coast use pipelines rather than tankers to reduce the risk of a major spill. The bill was strongly opposed by the oil industry.

Failed on the Assembly Floor.

LAND AND WILDLIFE CONSERVATION

6. PARKS AND OPEN SPACE

Substantial funding for California parks and open space acquisition and maintenance ran out ten years ago. **AB 18 (Villaraigosa)** provides \$2.1 billion to for a variety of urban recreation, habitat acquisition, and parks maintenance projects to address the severe need in this area. Passage was made possible by a pathbreaking diverse coalition pulled together by the Speaker, Assem. Keeley and Sens. Murray and Hayden.

▲ Signed into law. On ballot for March of 2000.

7. WILD AND SCENIC RIVERS

Most of California's rivers have been dammed and diverted for water. The results are diminished flows necessary to sustain wildlife and aesthetic values, as well as recreational opportunities. **SB 496 (Sher)** designates 39 key miles of the South Yuba River as "Wild and Scenic," protecting it from new and damaging dams. The bill had strong local support including the Nevada County Board of Supervisors, which sponsored the bill.

▲ Signed into law

ENVIRONMENTAL JUSTICE

8. ENVIRONMENTAL JUSTICE ✓

Environmentalists and community organizations have been trying for years to get the Legislature and Governor to address the issue of environmental justice, to ensure that low-income and minority communities do not suffer disproportionate impacts from environmental hazards. **SB 115 (Solis)** takes a small but important first step by requiring the Governor's

Office of Planning and Research to coordinate the environmental justice programs of all state agencies and the California EPA to develop a model environmental justice mission statement for the boards and departments under its jurisdiction. SB 115 is the first statute solely addressing environmental justice to be enacted in California.

▲ Signed into law

SOLID WASTE & RECYCLING

9. RE-AUTHORIZATION OF CALIFORNIA'S RECYCLING PROGRAM (BOTTLE BILL) ✓

California's beverage container recycling program or "Bottle Bill" is one of the most successful in the country, but it is limited to carbonated beverages. **SB 332 (Sher)** expands the program into the booming areas of fruit drinks and bottled water and applies it to plastic bottles.

▲ Signed into law

10. RECYCLING PLASTIC ✓

The plastics industry has lagged behind every other major packaging industry in re-using or recycling its product. **SB 1110 (Chesbro)** would have increased the recycled content requirement and recycling rate for rigid plastic packaging from 25% to 35% - making it consistent with glass.

Held in the Assembly. Two-year bill.

TOXICS

11. TOXIC POLLUTION IN BAYS

California's bays are widely contaminated with toxic chemicals degrading the environment and posing a health threat to anyone who consumes bay fish. The *Bay Protection and Toxic Clean-up Program* had successfully studied and characterized the extent of the problem over the last ten years. **AB 641 (Lempert)** would have extended the program by re-authorizing its funding source and moving it into the next logical phase - cleaning up the contaminated areas. The bill was strongly opposed by the oil industry, sewage plants operators and farmers whose facilities have contributed to toxic hot spots.

Failed on the Assembly floor.

12. PESTICIDES IN SCHOOLS ✓

87% of California's schools reported using pesticides that cause cancer, reproductive harm, or acute nerve damage on school grounds in 1998. Separate reports by the Department of Health Services identified widespread problems with indoor air quality, lead contamination, toxic mold and radon in California schools. **AB 1207 (Shelley)** would have provided training to school personnel in least-toxic pest control and maintaining healthy indoor air quality. It would have also

required schools to warn parents prior to the spraying of pesticides on school grounds and authorized a study on the health impacts of portable classrooms. The bill was strongly opposed by the pesticide industry.

▼ Vetoed

13. TOXIC SCHOOL SITES ✓

The discovery of widespread toxic contamination at the new Belmont Learning Center in Los Angeles highlighted the growing problem of schools built on toxic sites. The problem, however, is not limited to new sites, where authorities should do a thorough environmental assessment *before* committing to a site. Many school districts are discovering that their existing schools also are contaminated. **SB 993 (Hayden)** would have required school districts, as a condition of funding, to upgrade schools, to evaluate whether sites pose toxic risks to children and to take necessary steps to address the risks. The bill also would have authorized communities to create an oversight committee to watchdog the cleanup efforts.

▼ Vetoed

WATER QUALITY

14. COASTAL POLLUTION ✓

California's beaches are frequently fouled with pollution resulting from storm water "runoff" from developed areas. **AB 511 (Wayne)** would have incorporated control of polluted runoff — also called "non-point source pollution" — into the coastal commission's mandate to manage development along the coast.

Held in Senate committee. Two year bill.

15. OIL SPILL PREVENTION ✓

Prosecutors have had trouble adequately punishing polluters who spill oil in inland waterways because the penalties provided in law are too mild. **AB 680 (Lempert)** would have extended the stiffer penalty scheme that exists for ocean spills (the Oil Spill Prevention and Response Act-OSPRA) to spills in inland waters. OSPRA has successfully provided a deterrent to ocean spills this decade.

Held in the Senate. Two-year bill.

16. ENFORCING CALIFORNIA'S CLEAN WATER LAWS ✓

A January report by the independent Legislative Analyst's Office revealed that only 1% of Clean Water Act violations in California results in a fine. **AB 1104/SB 709 (Migden)** corrects the problem by requiring a mandatory minimum penalty for repeat violators, and requires that penalties offset the economic benefits of continued pollution. It also gives the state new authority to force problem polluters to practice aggressive pollution prevention techniques.

▲ Signed into law

clip here and take with you to the polls!

The most important vote not counted in this Scorecard is yours...

Inside the **1999 California Environmental Scorecard** are the environmental scores for your State Senator and Assemblymember, and how they voted on the most important environmental bills of the year. The Scorecard can help you separate the campaign rhetoric from the actions of those running for office.

Each election day, Californians have an opportunity to send an important message to Sacramento and Washington, D.C. The message is that this is no time to turn back on the journey towards healthy air, clean water, and protection of our natural environment.

The most important vote not counted in the Scorecard is yours. We've counted the legislative votes, and now your vote is needed to elect candidates with environmental commitment to office. Please remember to cast your vote on every election day.

On the other side of this page is a list of the League's March 7 primary endorsements that you can clip and take with you to the polls. To help you identify the endorsements for your area, check the top left corner of your mailing label for a list of your legislative district numbers. "CD" = congress; "SD" = state senate; "AD" = assembly.

For more information, visit Ecovote Online at www.ecovote.org or call us at (510) 271-0900.
